Artur Crețu

Full-Stack Developer · AI Engineer · 16+ Years Experience

Building complete systems from frontend to backend, automation, and AI. I treat programming languages as tools — real results come from logic, architecture, and problem-solving. 285+ projects in the last 2 years alone, across WordPress, React, Node.js, .NET, and blockchain.

💼 EXPERIENCE

Full-Stack Web Developer
Sep 2019 — Present
S.R.L. LEADGEN · Chișinău

- Full-stack web development with modern frontend + scalable backend architectures
- WordPress advanced: custom themes & plugins from scratch, WooCommerce, multivendor
- ReactJS and NextJS interfaces, optimized for speed & SEO performance
- AI implementations using RAG systems and direct SQL data querying
- API integrations (external, internal, AI, third-party services)
- Server administration, deployment, security & performance optimization

`PHP` `Node.js` `Next.js` `React` `WordPress` `SQL` `AI/RAG`

Facebook Media Buyer & Automation Dev
May 2021 — Oct 2023
ShamanAds · Chișinău

- End-to-end automation for all Facebook Ads processes
- AI-based data analysis for budget and performance optimization
- Tracking, reporting systems & campaign management with profitable scaling
- API and Puppeteer-based automation integration

`Puppeteer` `API` `AI Analytics` `Facebook Ads`

Full-Stack Web Developer
May 2018 — Aug 2018
Business Expert · Chișinău

- Delivered 9+ individual web projects in ~5 months
- Complete redesigns, responsive layouts, speed & UX optimization

`WordPress` `HTML/CSS` `JavaScript`

Full-Stack Freelance Developer
Jan 2011 — Aug 2018
fl.ru · Remote / Chișinău

- Self-taught developer; 7+ years of active freelance work on fl.ru platform
- Client communication, on-time delivery, documentation management

`HTML` `CSS` `JavaScript` `PHP` `WordPress`

LAST 2 YEARS

285+ PROJECTS	**14** STORE APPS
135 WP SITES	**28** REACT APPS

Coding since 2009 · 16+ years total experience

⭐ SKILLS

FRONTEND
`React` `Next.js` `TypeScript` `Vue.js` `Angular` `Tailwind` `Bootstrap` `XAML` `HTML/CSS`

BACKEND
`Node.js` `PHP` `C# / .NET` `Laravel` `Express` `Python` `Linux`

CMS / E-COMMERCE
`WordPress` `WooCommerce` `Dokan` `ACF Pro`

AI & DATA
`OpenAI` `Gemini` `Claude` `RAG` `TensorFlow` `OpenCV` `Whisper`

DESKTOP & DEVOPS
`WinUI 3` `Electron` `Docker` `nginx` `Git`

DATABASE
`MySQL` `PostgreSQL` `MongoDB` `MariaDB` `SQLite` `Redis`

BLOCKCHAIN
`Solana` `TON` `Ethereum` `Smart Contracts` `NFT` `Web3.js`

▦ PROJECTS BY SKILL — from last 2 years

WORDPRESS / MARKETPLACE — 25+ stores

NOXX Store — React Chatbot Widgets

Custom React component library (@noxxagency/ui) for embeddable chatbot and social media widgets. Framer Motion animations, @tsparticles/react effects, cookie consent GDPR, lightbox gallery. Published as reusable npm packages.

`React 18` `Framer Motion` `npm Package` `GDPR`

PROXY / NETWORKING — 3 tools

ProxyServer — Multi-Protocol Proxy

Nuxt.js SSR frontend with nuxt-socket-io real-time communication, MariaDB persistence, multi-protocol proxy management (HTTP/SOCKS5), bandwidth monitoring, user authentication, and live proxy health checking dashboard.

`Nuxt.js` `Socket.io` `MariaDB` `SSR`

ANTI-DETECT / SECURITY — 2 tools

AntyBrowser — Anti-Detect Browser

Electron-based anti-detect browser with Puppeteer fingerprint spoofing, canvas/WebGL randomization, timezone/locale emulation, proxy-per-tab isolation, session persistence, and multi-account management.

`Electron` `Puppeteer` `Express` `Fingerprint`

SOLANA / DEFI — 4 bots

ArtTrade — Solana Trading Bot

High-frequency Solana trading bot with Raydium/Jupiter DEX integration, real-time price monitoring via WebSocket, automated buy/sell strategies, wallet management using @solana/web3.js, and profit tracking.

`Solana` `@solana/web3.js` `Raydium` `Jupiter`

CRYPTO / TRADING — 4 bots

RubiCoin — Solana Trading Bot

Grammy-based Telegram bot for automated Solana token trading via @solana/web3.js, real-time Raydium/Jupiter DEX monitoring, buy/sell strategies with configurable slippage, PnL tracking.

`@solana/web3.js` `Grammy` `Raydium` `Jupiter`

LARAVEL / PHP — 21 projects

HRPortal — Corporate HR Platform

Full corporate HR system with WPML multilingual support, WP Job Openings, WP Event Manager, Cookie Law Info (GDPR), Contact Form 7, Popup Maker, and Google Tag Manager.

`WordPress` `WPML` `PHP` `MySQL`

WINUI 3 / .NET — 14 apps

VibeProxy — Local Proxy Manager

Windows Store-published desktop app for managing local proxy servers. WinUI 3 + .NET 9, MVVM architecture, system tray integration, settings persistence, network traffic management.

`WinUI 3` `.NET 9` `MVVM` `MSIX`

BROWSER EXTENSION — 3+ extensions

Trolles — Chrome Extension Suite

Chrome Manifest V3 extension with encrypted local storage via CryptoJS, functional programming with Ramda, Webpack 5 bundling with code obfuscation for IP protection.

`Chrome MV3` `CryptoJS` `Webpack 5` `Ramda`

PYTHON / AI — 6 projects

ArtBDO — Computer Vision Tool

Desktop automation tool combining OpenCV computer vision with Node.js Electron shell, real-time screen capture analysis, pattern recognition for game UI elements, and Telegram bot integration.

`OpenCV` `Electron` `Node.js` `Telegram Bot`
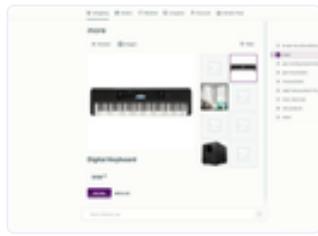

LMS / EDUCATION — 5+ sites

MahWheel — Online Learning Platform

Complete LMS platform with LearnDash + LifterLMS dual integration, BuddyPress social features, Talemy theme customization, course management, student progress tracking.

`LearnDash` `LifterLMS` `BuddyPress` `WordPress`

📂 RECENT PROJECTS

LAST 4 WEBSITES

Acorre
AI-assisted ecommerce store with account, coupons, and guided shopping flow.

Parkline
Multilingual industrial marking site (EN/ET/FI) with services, gallery, and lead capture.

MadeByPhotos Pro
Advanced film-scanning commerce experience with calculators, tiered pricing, and shipping workflow.

Donker Media
Dutch animation studio showcase focused on case studies, testimonials, and conversion-first messaging.

LAST 4 APPS

Clean My Windows
.NET 9 + WinUI 3 system maintenance utility with modern native UX.

War Thunder Tactical Map
Read-only tactical visualizer using local game telemetry for live map awareness.

Noise Monitor
Professional real-time noise detection, analysis, and event recording app.

Project Launcher
Tray-first productivity launcher for developers with keyboard-centric flow.

⭐ WHY ME?

⚡ Extreme Velocity
285+ projects in 2 years. I ship fast without sacrificing quality — from idea to deployment in days, not months.

🧠 Full-Stack Generalist
Frontend, backend, databases, DevOps, AI, blockchain — I don't just "know" these, I build production systems with them daily.

🤖 AI-Augmented Workflow
I use AI tools (OpenAI, Claude, Gemini) as force multipliers — building custom MCP servers, RAG systems, and AI-powered development pipelines.

🔧 Builder, Not Just Coder
I see beyond code — understanding business goals, user needs, and system architecture. 14 apps published on Microsoft Store prove I ship complete products.

🌍 Self-Managed & Reliable
16+ years of freelance discipline. I manage my own deadlines, communicate proactively, and deliver on time — every time. No hand-holding required.

🖥️ Perpetual Learner
Self-taught since 2009. I pick up new technologies in days — from Solana smart contracts to WinUI 3 desktop apps, from RAG systems to browser extensions.
